

圣诞小屋16011灯光安装说明书

Mould King 16011 Christmas Cabin Snow House
Lighting Installation Instructions

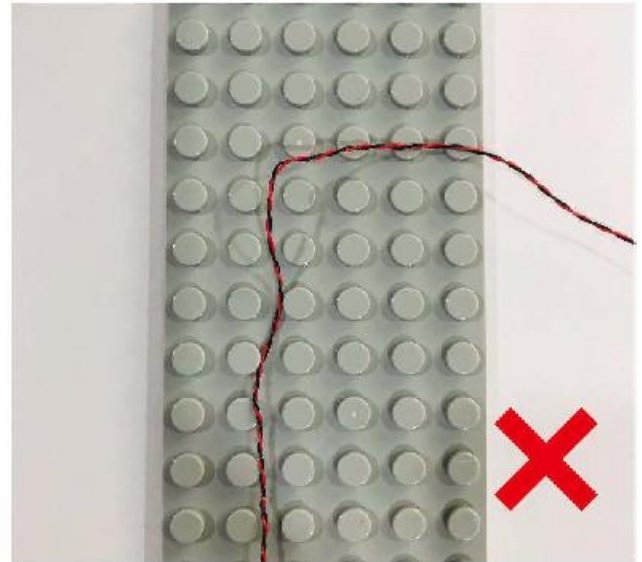

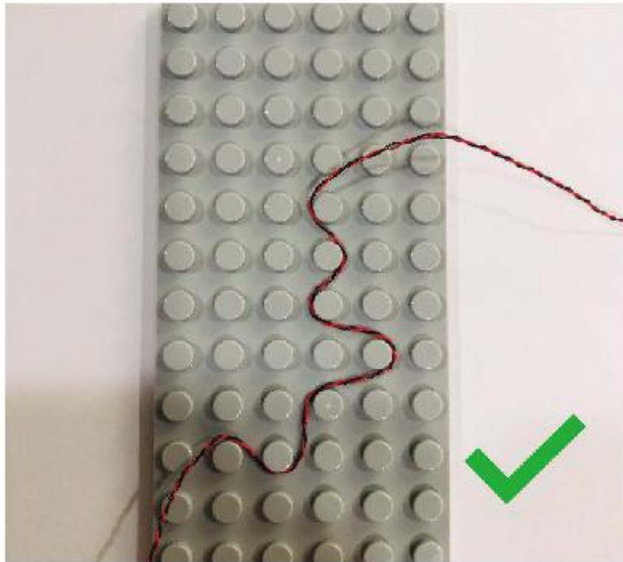

Lighting Installation Instructions

Notice:

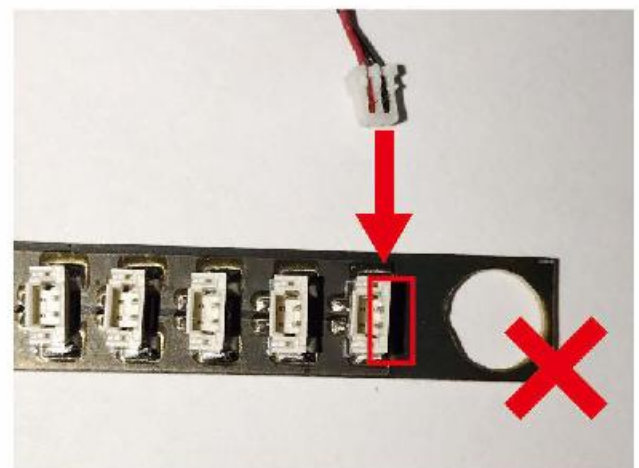

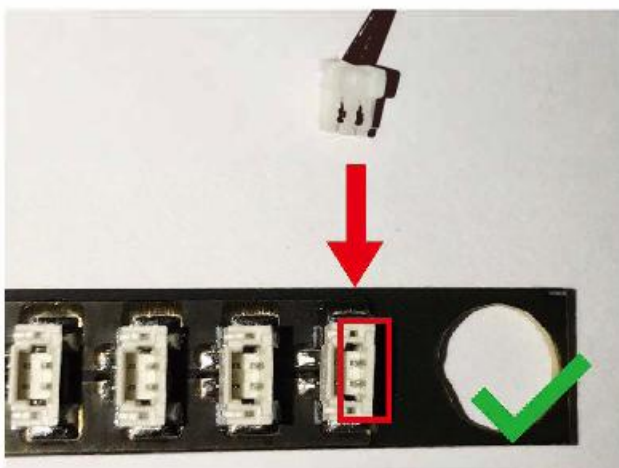

Route wires above or below building blocks

Wires can be routed between or underneath building blocks, and wires must be routed correctly around the edges of studs.

Wire socket connection socket

Be careful when making electrical socket connections; the sockets can only be inserted one way. The side of the socket with the exposed wires should be facing the soldered = symbol. If the plug is difficult to insert, please do not force it. Incorrect insertion can cause the pins in the socket to bend or the socket to overheat.

Before installing the product, you must carefully read the lighting instructions. When installing the product, the lighting must be coordinated with the installation product.

Assemble to step 18 of the building block instructions, and cooperate with the installation

1. Take a wire light string

装配到积木拼装说明书第18步配合安装

2. Arrange the wire light string as shown in the picture

Assemble to step 112 of the building block instructions, and cooperate with the installation

装配到积木拼装说明书第112步配合安装
